Stone Lion SW-7507

## Discontinued Colors

If a discontinued color is existing on a home, it may be re-painted the same color.

## Optional Metallic Garage Door Color

Some color palettes are complimented well by a metallic garage door. This option should be considered carefully, and painted by a professional painter.

## Painting Guidelines

- Owners should consider painting the exterior of their home every 8-10 years depending on exposure and condition. Garage doors should be considered every 5-7 years.
- Each color palette consists of four colors. The main color is the suggested house color, other colors may be used for garage doors and optional trim. (3 colors maximum)
- Unless otherwise noted \* house color may be any color within the same palette.
- Optional trim = eaves, crown molding or both.
- With approval, a color from one palette may be combined into another palette.
- Homeowners should submit an ACC Application with selected colors listed for: house, garage doors, and trim before any work begins.

## Notes:

+ New color added to existing palette.

\* Color may be used for garage door and trim only
